## Who should attend?

This one-day event is the first national conference for all **qualified non-medical prescribers**. It is also the second National Prescribing Centre (NPC) conference focusing on extended prescribing responsibilities.

It forms a key initial element of a range of NPC activities to be delivered throughout this year and beyond, aimed at supporting the expanding non-medical prescribing agenda.

This conference will help non-medical prescribers define and maintain competency in their role and actively contribute to their continuing professional development. The programme will present information, explore issues and increase knowledge of selected key topics that need to be considered in order to ensure that prescribers deliver patient care safely and effectively.
